# ARABESQUE

## *Acacia Honey*

“Arabesque” is one of the noblest of the world famous Hungarian acacia honeys. It is the clearest honey, with more than 30% acacia pollen content. For the Ancient Greeks, honey was the “food of the Gods”, and its properties have been recognised by doctors since the beginning of written history. In Hungary - where a large part of European acacia honey production takes place - the centuries-old traditions of honey making are still very much alive. The families involved in honey making know all about the healing properties of the yellow acacia liquid. Within the Arabesque range there is a clear acacia honey, the honeycomb (nature's most delicious sweet in its original packaging), and a honey speciality with almond and walnut, which goes exceptionally well with other flavours.

### Nutrition Facts

Total Sugar content	75.2 %
Reducing Sugar content	73.5 %
Sacharose content	1.5 %
Fructose content	42.8 %
Glucose content	25.5 %
Acacia Pollen content	51 %

# ARABESQUE

## *Acacia Honey*s

Finest acacia honey from Hungary, with extra high nutrition contents. Especially gentle extracted by cold-straining. Also bottled with different nuts (walnut, almond) and with comb. Comb-honey is the most natural form of honey consumption. The honey-bee “prepares” honey from the nectar of flowers then covers the matured honey with natural wax, this is the comb-honey.

We produce this kind of framed comb-honey in special hives manufactured especially for this purpose.
